COLORECTAL EMR COURSE

Endoscopic Mucosal Resection

🕒 A Practical One-Day Course

FORMAT

One day — didactic morning + hands-on afternoon

STATIONS

4 parallel stations

ENROLMENT

16 participants (4 per station)

LIMITED SEATS

TARGET AUDIENCE

GI consultants, advanced fellows & senior GI fellows

CERTIFICATE

Certificate of Course Completion

Course Learning Objectives

Characterise colorectal lesions using Paris, Kudo, NICE and JNET, and predict resectability.

Stratify submucosal-invasion risk and correctly triage lesions to EMR, ESD, or surgery.

Perform the complete EMR workflow — injection and lift, snare resection, defect evaluation, margin ablation, and tattoo.

Recognise and manage bleeding and perforation, including generator settings and antithrombotic considerations.

Plan post-EMR surveillance and evaluate the scar for residual or recurrent adenoma.

Select strategies for difficult lesions and appropriate adjunct techniques.
